

AeroPlay is the very latest innovation in playground products to enhance play value, stimulate imaginative play and add vibrancy to playground environments.

FEATURES

- ✓ Patented Rebound Impact Absorption
- ✓ Wide range of Colours
- ✓ Expanding range of different animal characters & objects
- ✓ Iconic / Thematic Designs
- ✓ Low Heat Absorbency
- ✓ Maintenance Free
- ✓ Highly Durable, and...
- ✓ Affordable

Turtle

Crocodile

BENEFITS

As well as being lots of fun, Aero Play systems are designed to improve balance and gross motor skill development and have educational benefit in terms of bringing identifiable objects in nature into the controlled play environment. Using the Aero Cool flexible membrane coating, AeroPlay offers a wide range of coloured, theme-based activities unlike anything else on the market. As with the full range of Aero playground products, AeroPlay is maintenance free, highly durable, heat resistant and cost competitive in comparison with traditional playground equipment.

APPLICATIONS

Aero Play products are suitable for a variety of play environments including Child-care, Preschool and Public Playgrounds, to add vibrancy and additional play value to the traditionally hard and structural playground area. The play shapes are ideal for both outdoor and indoor installation and cater for a wide range of age groups. Aero Play shapes can be used singly or in conjunction with each other to create balance obstacles or enhance a themed playground environment. Aero Play Shapes can also be used in conjunction with Aero Safety Surfacing to create a vibrant and integrated playground environment. Aero Cool coating, which can be used to enhance and individualise the appearance is specially formulated to resist temperature extremes and fight off ultraviolet degradation.

AEROPLAY MATERIALS

Base System.....

All AeroPlay shapes, animals and equipment are manufactured using A1 Rubber's new patented 'Slow Rebound Protection' (SRP) raw material composition. This composition is durable and reduces weight by up to 30% making installations easier. It is softer than 100% composite rubber products and has a slower rate of recovery providing far better impact attenuation properties. AeroPlay shapes are cast in a solid colour composition so the external finish will not scuff or rub off over time. All seams are sealed and bonded with a tough, flexible, abrasion resistant polyurethane construction adhesive.

Dolphin

Colours and Coating.....

AeroPlay rubber shapes are available in a range of solid colours, including red, blue, green and ghost gum. Aero Play Shapes can be finished with AeroCool Coating to give them a more lively and playful appearance. (See the eyes and mouth on the Dolphin above and the full Aero Cool finish applied to the large frog at right.) Aero Cool coating is a heavy bodied, multi-purpose premium grade acrylic that is UV resistant, highly durable and easy to apply.

Cork Lizard

Assorted Rocks

Sea Shell Seat

Large Frog decorated with Aero Cool

The Cork Alternative.....

AeroPlay animal shapes are also available in a natural looking cork composition —perfect for nature gardens.

COMPLIANCE

AeroPlay products comply with and exceed AS1924.1-1981 Parts 1 & 2, AS2155 1982 and AS/NZS 4486:1.1997 Part 1 which together make up current Australian Standards for playground equipment. Our range of Aero rubber softfall surfaces which are recommended for use with AeroPlay products, comply with AS/NZS 4422.1996 for playground safety surfacing.

WARRANTY

The manufacturer warrants the owner that the protective surface will be free from manufacturing defects for a period of 3 years provided installation is in accordance with the manufacturer's installation specifications and when used for the purpose which the manufacturer intended.
